

# SECURE HARD DRIVE DESTRUCTION™

Hard drive security has become a major concern in the past decade as an ever-growing amount of sensitive information is stored on computer systems. Obsolete and unusable hard drives may contain data which can not be deleted, making your business's information available to any persons who may have unscrupulous intentions. **Total destruction is staying safe.**

## Security

All equipment at SHDD is endorsed by the Security Construction and Equipment Committee.

SHDD is a member of the National Association for Information Destruction (Australasia).

## Destruction Service

**1-2-3** At SHDD, we provide the full service in 3 STEPS - collection, arrival at facility & destruction.

3mm, 6mm, 9mm or 12mm debris size - at SHDD, you choose the level of destruction you require.

A Certificate of Destruction is issued for every destruction job, verifying that destruction is complete.

SHDD destruction services are available Australia-wide.

## Extra Services

You can choose to have the serial numbers for each hard drive recorded.

You may also choose to have the entire destruction process recorded in HD digital video.

You have the option to view the entire destruction process, in person or remotely by computer

## Green is Clean

All hard drive debris is collected & recycled in Australia, helping to keep our environment green.
